

United Research World Prayer Focus

March 2001 -
Vietnam

*submitted by Kitty
Cromwell*

Kitty reminds us that we need to focus our energies on this beautiful yet forgotten country.

Reprinted from the May 1998 United Research Newsletter:

Vietnam's borders touch China, Laos, Cambodia. Its extensive coastline reaches the Bay of Tonkin, the South China Sea, and the Gulf of Thailand.

Namviet, its earlier name in modern times, means Southern Minority. This country is the poorest in the world and is believed to be one of the most beautiful. Its people are extraordinarily loving, forgiving, hard working, long-suffering, and innovative.

Wars have been fought for years by other nations on the soil of this beautiful, fascinating land. There is not one family today in Vietnam that has not lost a member in war.

Please join me and others in prayer during the month of [March] for these very special people and their precious country...all treasured in the Heart of God.
